## Irish OpenSolaris User Group Lightning Talks

### OpenSolaris on a laptop

Why you should (and shouldn't!)  
run OpenSolaris on your laptop

## Why you shouldn't ...

- Perceived lack of drivers
- No suspend / resume
- Hard to get additional software

## Why you should ...

- ZFS
  - Copies
  - Snapshots
  - Multiple boot environments (with zfs root/boot)
- NWAM
- DTrace
- Nice windowing system
- It's very very stable

## Lots more goodies to come

- Further **NWAM** goodness on it's way
- Better multimedia support
- More **wifi cards** supported
- More **power mangement** coming
- 307 **laptops in the HCL** – more being added
